

## Sound-absorbing Ventilation Grilles

Reduce noise emission  
through vents.

[www.doxnoisecontrol.eu](http://www.doxnoisecontrol.eu)

*Reduce the impact of noise on your  
surroundings, protect staff and  
absorb installation noise.*

**D**  **X** Noise Control.

*LESS NOISE, MORE HARMONY.  
SOUNDS LIKE SILENCE.*

**D**OX Noise Control is a specialist in the delivery and installation of acoustic grilles. The sound-absorbing grilles are suitable for a wide range of applications where large air volumes are emitted: construction, industry, and the ventilation of machines and installations.

All our sound-absorbing ventilation grilles are specially developed to optimally reduce noise emission through vents. There are various types of sound-insulating grilles depending on sound insulation, installation depth, and air volume.

Our sound-absorbing grilles are standardised. However, for specific challenges, we always offer a suitable solution to meet the exact requirements of your project.

Our grilles are extensively tested. This allows us to work out the appropriate solution according to the flow rate, pressure loss, and acoustic requirements.

# Acoustic Ventilation grilles

Sustainable, efficient, and high return.

## APPLICATIONS

- **Industry:** façade grilles for ventilating plant rooms, installations, and machines.
- **Construction:** façade grilles suitable for commercial and residential buildings.
- **Ventilation of machines and installations:** wall grilles as a sound-absorbing wall, or part of a complete solution.

## ADVANTAGES

- ✓ high noise reduction and low air resistance with small installation depth
- ✓ slats with high-quality absorption material
- ✓ rain and bird proof
- ✓ preservation and polishing in RAL colour of choice
- ✓ standard or customised grille
- ✓ sustainable and low maintenance
- ✓ great design freedom

A custom grille  
for every application

## PROPERTIES

- High noise attenuation ( $R_w$  max. = 24 dB)
- Low air resistance
- Rainproof
- Low installation depth (min. 150 mm)
- Options with mounting flange, bird netting, and powder coating in RAL colours
- Choice of other materials, e.g. seawater-resistant aluminum, and stainless steel
- Aesthetic added value due to identical appearance of grilles with different insulation values
