

Industrial Noise Barrier

Shielding off sound sources with
sustainable sound-insulating and
absorbing panels.

www.doxnoisecontrol.eu

*Reduce the impact of noise on your
surroundings, protect staff and
absorb installation noise.*

DOX Noise Control.

*LESS NOISE, MORE HARMONY.
SOUNDS LIKE SILENCE.*

The industrial noise barriers of DOX Noise Control have both sound-insulating and sound-absorbing properties. This makes them extremely suitable and widely usable in industrial environments. The noise barriers consist of panels that are slid horizontally into a support structure. A perfect acoustic seal is guaranteed between the panel and the support structure. The noise barriers can be installed inside or outside. Wind and steel structure calculations provide certainty about sufficient load-bearing capacity and wind resistance.

Choose from various types of panels, materials, and finishes for a soundproof wall, based on the environmental conditions, acoustic requirements, safety requirements and other specifications.

Industrial Noise Barrier

Flexible, sustainable and modular.

APPLICATIONS

- Noise screens
- Partitions
- Front panels
- Control booths
- Enclosures
- Infrastructure

- **ALUMINUM NOISE BARRIER:** one-sided perforated aluminum sheets (alternative versions available), mineral wool filling, and black glass fibre fabric finish.

Available in your choice of RAL colour.

- **PAINTED STEEL NOISE BARRIER:** polyester-coated outer sheet, glass wool / rockwool core, and perforated inner sheet.

Excellent fire-resistant and thermal properties.

- **WOODEN NOISE BARRIER:** spruce or larch wood panels with a special sound-absorbing mineral wool package – extremely suitable for outdoor applications.

ADVANTAGES

- ✓ sustainable and high-quality
- ✓ indoor and outdoor use
- ✓ weatherproof and fire-resistant versions
- ✓ simple and quick installation and disassembly
- ✓ high-quality materials
- ✓ hard-wearing, maintenance-friendly, and high resistance
- ✓ ecological and recycled versions possible
- ✓ high noise insulation and absorption values

A custom barrier for every application

OPTIONS & POSSIBILITIES

- Choice of various types of panels, materials, and finishes
- Wall support structures calculated for wind loads
- Weatherproof versions for outdoor use
- Wall to be combined with acoustic ventilation grilles, sound-insulating doors and windows
- Portable/movable screen possible
- Suitable as free-standing screens or attachable to existing walls
